Dated July 18, 2012

New! REASON FOR THIS SUPPLEMENT

- *Provide additional information regarding methods for transporting affected vehicles to the dealership.*
- *Inform dealers of a special Roadside Assistance phone number for this FSA.*

AFFECTED VEHICLES

Certain 2013 model year Escape vehicles equipped with a 1.6L engine built at the Louisville Assembly Plant from Job 1 through July 11, 2012. Affected vehicles are identified in OASIS. In addition, for a list of vehicles assigned to your dealership, visit <https://web.fsavinlists.dealerconnection.com>. This information will be available on July 18, 2012.

REASON FOR THIS SAFETY RECALL

In some of the affected vehicles, a fuel jumper line between the body mounted fuel line and the rear of the engine may have been damaged during the manufacturing process. If the fuel line is damaged, a significant fuel leak may occur without warning. A fuel leak in the presence of an ignition source may result in a fire.

Parts to complete the required repair are expected to be available the week of July 23, 2012.

PLEASE NOTE:

Federal law requires dealers to complete this recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$6,000 per vehicle. Correct all vehicles in your new vehicle inventory before delivery.
